- Reports: Use Cases

Who is it for?

Polarion Administrators, Requirements Engineers, Business Analysts, Test Managers, Test Engineers, QA Managers and Project Managers

Polarion Test Management

Category: Siemens Polarion course

Duration: 2 days

Location: Kaizen PLM Office, Client Site, Remote (Online)

User Level: Beginner

You will learn how test cases can be tracked and managed within Polarion QA. Different ways how test cases can be planned and executed are covered, as well as the tracking of defects found during test executions.

Traceability and coverage is a key element for an effective Test Plan and consistent Test Case descriptions. Practical exercises will teach you how to manage traceability between test cases and requirements. After the training, you will understand how to create professional Test Results reports to proof and ensure that your product was properly tested and is ready for release.
